Maximise the use and reuse of your research through a variety of article types

Review

 Provides a balanced and comprehensive summary of the latest discoveries in the field which can be cited in subsequent articles.

Study Protocol

 Allows researchers to present their rationale and proposed methods for their study and get these peer reviewed.

Method Article

- Can be used to present new methods or modifications of existing methods.
- Methods support robust, reproducible research, and research training while ensuring those who developed the method are given credit.
- Can be updated as the method is refined.

Brief Report

 Publishing a Brief Report during the data collection stage of your project allows you to analyse a sub-set of the data and to validate it.

Data Note

- Allows researchers to present their data openly in a highly discoverable, useable, and reproducible way ensuring they get both recognition and credit for their data.
- Data Notes can then be linked to any subsequent research articles using the data.

Research Articles

Writing a Research Article at the analysis stage of a research project is now really easy:

- Published Reviews, Study Protocols and Methods are citable.
- 2 Data, relevant code and software is already available and can be linked and cited.

CONCEPT PLANNING DATA COLLECTION ANALYSIS

Brief Report

- Brief reports allow researchers to share small preliminary studies, describe unexpected or unexplained results or small finding that traditional would be hidden away in supplementary materials.
- Can be described using a few illustrations or even a single figure.

 Software tools and code are themselves a research output.

Software Tool Article

 Software Tool articles therefore improve the transparency, visibility and reproducibility of algorithms, code, workflows etc. developed as part a research project, while ensuring the researchers and any associated developers are credited.

Method Article

 A Method Article can be produced alongside a Software Tool Article to provide detailed operational instructions to facilitate reuse.

Brief Report

 Ensures that findings outside the scope of the Research Article are made accessible.
